

NEW!

X-TRACT

for magnesium removal

Aluminum sorting in the 5 - 30mm (0.2" - 1") fines range, as well as the 30 - 150mm (1" - 6") mid-size and large size range

Reliable, robust and cost-effective alternative to sink-float separation

New configuration to sort materials of different material densities

Minimizing material losses and greatly reducing their reliance on costly and risky manual sorting

X-TRACT

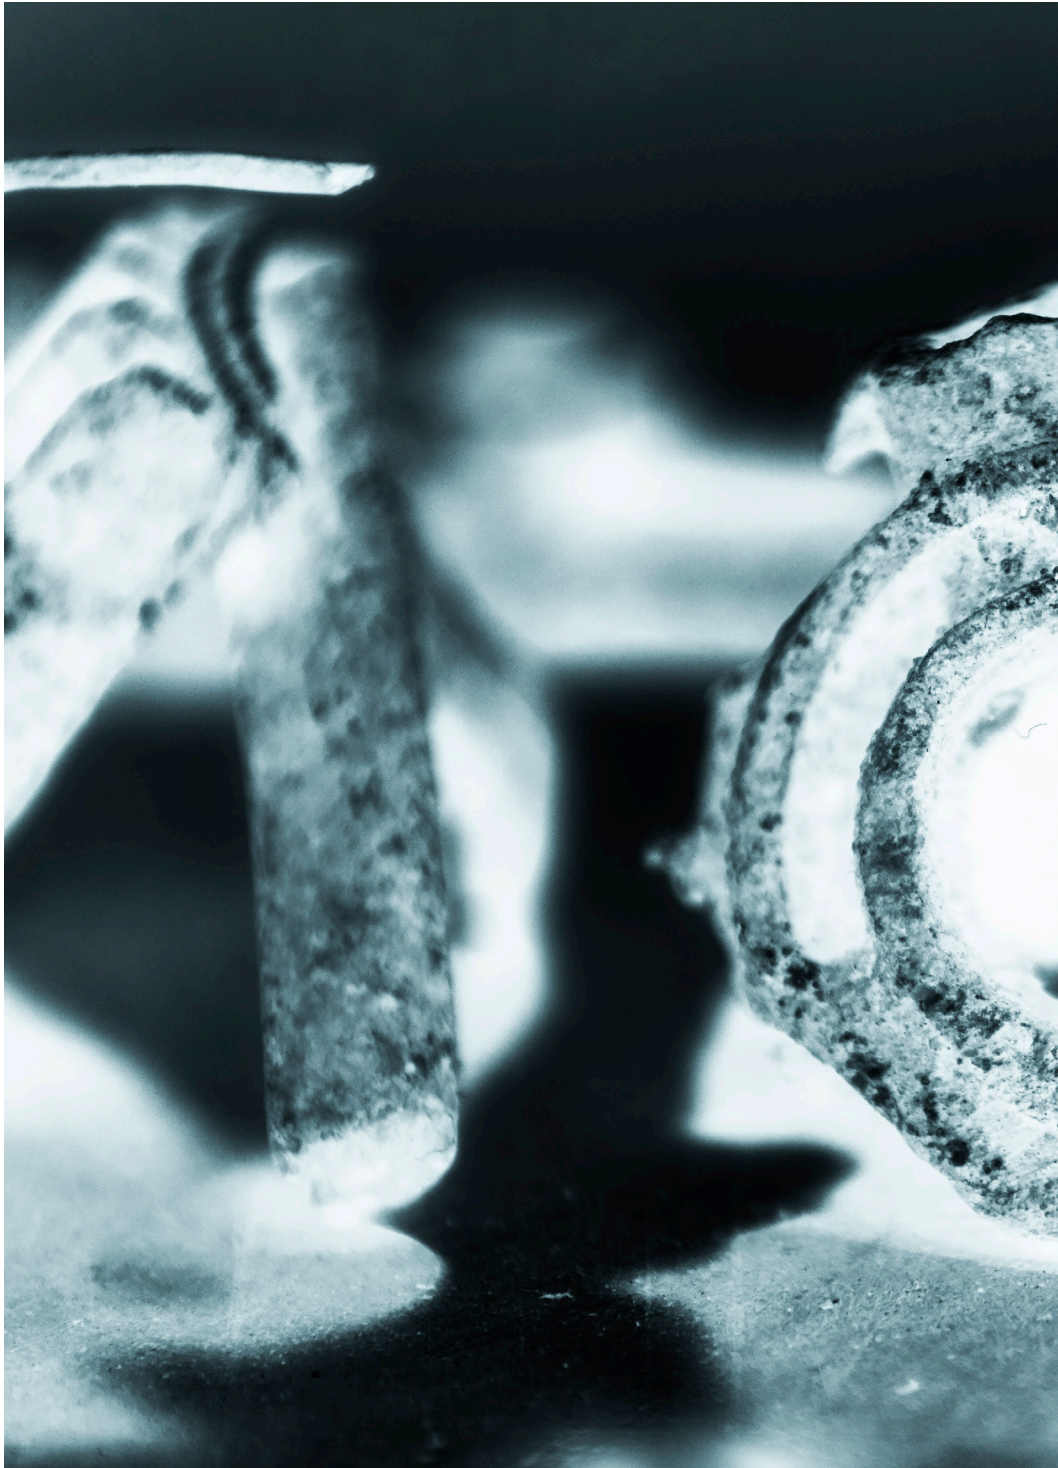

TOMRA's X-TRACT units for magnesium removal now features enhanced X-Ray technology to efficiently separate magnesium from aluminum in Zorba materials. With consistently high purity rates of 99% being achieved in field testing, the material can be treated and traded on local markets as it meets the stringent quality requirements of domestic customers.

ALUMINUM

Improve Aluminum smelter recovery numbers with less free Magnesium in loads.

More cost effective and better purity than a sink/float dense media system.

MAGNESIUM

Improve Magnesium purity to
Magnesium Recyclers.
